

# Fireplaces of America, Inc.

44 Main Street  
Englishtown, NJ 07726

Measurements should be taken with a steel tape and should be accurate to within 1/16 inch. The fireplace should also have the following:

- Suitable mounting surfaces on top and bottom of the opening
- The mounting surface must be level
- The fireplace opening should be square. Any out of square conditions will be exaggerated or the door may not fit

Please use the following picture to determine the size of your enclosure:

A) Top Width: \_\_\_\_\_

B) Bottom Width: \_\_\_\_\_

C) Left Height:

1. \_\_\_\_\_

2. \_\_\_\_\_

D) Right Height:

1. \_\_\_\_\_

2. \_\_\_\_\_

E) To Mantel: \_\_\_\_\_

F) To Damper Control: \_\_\_\_\_

G) Masonry:

Left: \_\_\_\_\_

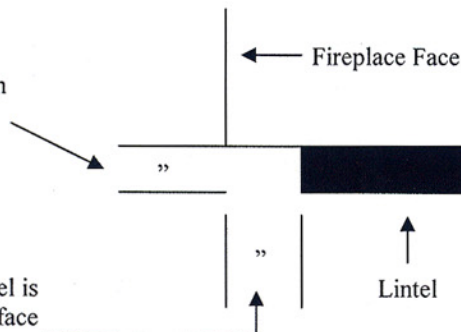

Right: \_\_\_\_\_

If Applicable:

To Mantel Sides: \_\_\_\_\_

A) Measure from bottom of lintel to beginning of fireplace. (If lintel is flush or above face material – note "0")

B) Measure how far lintel is recessed from fireplace face
